Operating Principle

Create or import starters under the SIUS shoot event listed in the matrix. The shooter group identifies the Norwegian Championship class. Some programs share one shoot event across several classes; choose the shooter group manually when adding the event or importing starters. "With final" event variants should only be used for classes marked with a final in the official NM exercise table.

Template Scope

ShooterGroupsTemplate.xml retains the standard international SIUS groups for other event types: Regulars, MQS, SH1, SH2, Guests, Junior, RPO, JuniorRecord, GP, GPMQS, Substitutes, Youth, YouthRecord, Precision, Sporter. The championship groups below are the groups used by the Norwegian Championship pistol setup; SH1 is both a standard SIUS group and an active NM pistol class.

Shooter group	Championship class
Apen	Open
Menn	Men
Kvinner	Women
Jr	Junior
Jrm	Junior men
Jrk	Junior women
U	Youth
V55	Veteran 55
V65	Veteran 65
V73	Veteran 73
SH1	Para shooting SH1

Target Allocation Notes
25 m: use targets 1-35 for normal competition allocation. Targets 36, 37, and 38 are reserve targets and should be held back unless needed for replacement, technical issues, or controlled overflow. 50 m: use targets 1-20 for competition allocation. No reserve targets are listed in this overview. Practical import check: starter CSV target numbers must match the target pool for the selected range before importing into SIUS Rank.
